is situated at Shiachar
Fatullah, Narayanganj.

Top Management

From the Desk of the Chairman

Since 1993, Unicom Textile Mills Ltd has been a frontline contributor in the march forward of the export oriented clothing industry of Bangladesh.

Pioneer in manufacturing Poly-cotton blend fabrics, it has been manufacturing and supplying woven fabrics to the export-oriented garment factories. As a sensible corporate citizen, Unicom emphasizes first the issues of people, environment and principles of ethics in manufacturing.

Led by competent entrepreneurs, managers, professionals, experts and staff, Unicom is committed to packing its buyers' every single penny with value and satisfaction.

Chairman

From the Desk of the Managing Director

It is more than twenty years by now, Unicom Textile Mills Ltd has been manufacturing and exporting woven fabrics with repute.

It manufactures and supplies fabrics to the export-oriented garment factories. Besides, it is a licensee fabric manufacturer for the globally reputed buyers as well. Ever since, we have been relying on state of the art European technology as well as extensive research and development in areas covering weaving, dyeing, printing, finishing and the likes to rationalize the economy of scale and synergy in operations which is meant for the ultimate benefits to our clients.

Our work environment, exhaust heat recovery system, ETP and CRP are just a few of our complaint commitments and environment friendliness.

Thanks our valued clients, we always look forward to serving them sincerely with warmth and service wherein quality, economy and delivery are nothing but the obvious integral parts of our Unicom culture.

Managing Director

Production Facilities

Unicom's production base is ideally vertical to be self reliant, subsequent to importing yarns and Greige fabrics from assorted suppliers from Indonesia, Thailand and India.

Yarn Dying

Its yarn dyeing production capacity amounts to 6.5 tons of world standard dyed cotton and blends of yarns per day. It is equipped with SSM hard and soft coning machines, STALM dryers and the likes.

Weaving

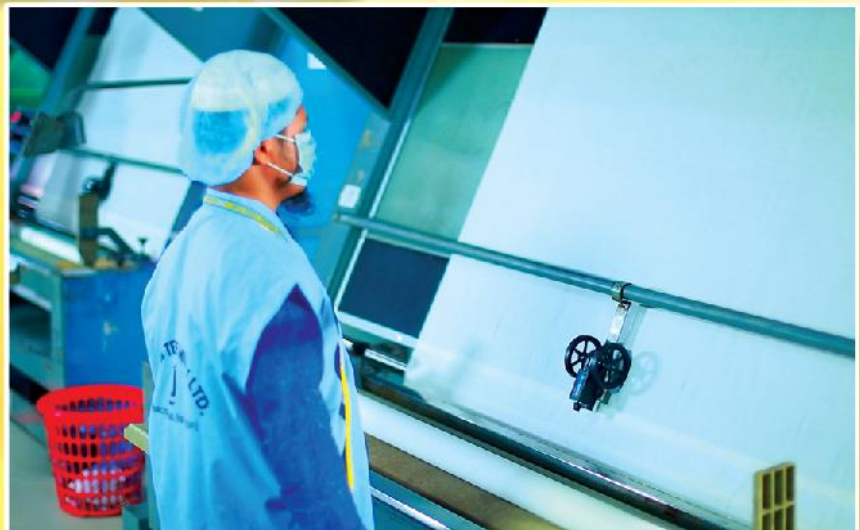

In weaving, Unicom is equipped with hi-tech machinery. It has sizing machine from the world best technology provider, Karl Mayer, Germany. Unicom has got the latest Toyota JAT810 and Tsudakoma ZAX9200i air jet looms. It

produces, on average, 20,000 yards of prime quality cotton and blended woven fabrics per day.

Grey Inspection

Grey inspection strictly conforms to four-point checking system, yard by yard, for all the fabrics it produces.

Fabric Dyeing

Heading for dyeing, however, at the entry point, all the grieger fabrics must have to pass sample tastes for each lots and batches invariably. Unicom is self-sufficient to dye all the grieger fabrics it produces and imports. It processes fabrics thru the state of the art machines such as

Singeing and desizing from Osthoff and Continuous scouring as well as bleaching from Benninger of Switzerland.

Printing

All over printing facility of Unicom is of world best standards in respect of all of technology, machinery and equipment, of course.

It has got AOP from Zimmer of Austria and Stork from Holland for printing while laser engraving machine from Switzerland.

Digital Printing

Eight headed Digital Textile Printing Machine has been installed. With production capacity up to 2000 yards per day it does reactive printing on 100% cotton & silk fabrics in 8 colors.

Finishing

Unicom has Continuous dyeing range from Monforts Germany and Pad steam wash from Benninger, Switzerland. It has Monforts - Monfongsstanter machines, Lafer & Xetma peach machines, and AERO 24 SPECIAL finishing machines which are of world champion brands from Europe.

All machines have been installed during 2016-2017. Unicom's dyeing finishing capacity at present is about 100,000 yards per day.

Laboratory

To ensure the height of dyeing standards, it maintains a state-of-the-art laboratory, which applies world class test protocols – calibrated most sophisticatedly. Pilot Lab for solid dyeing and all other testing facilities are the hottest in the world. All here are meant to ensure perfection in fabric dyeing. Unicom's lab is accredited by H&M.

Power Plant: To ensure uninterrupted power round the clock to all of the operations here, Unicom has a 3.5 Megawatt power generation system which is able to support its entire power demand.

CRP: Its Caustic Recovery Plant recovers about seventy percent of the caustic soda used in mercerizing of fabrics. Plant's capacity is 4.5 tons per day. This recovered soda is reused it in the process again and again, continually.

WTP: All the water that Unicom consumes is pumped through its own deep tube wells, and is appropriately treated through a water softening plant having the capacity of 75 cubic meters per hour.

Pond: It maintains a pond inside the premise that reserves recycled water from production and rainwater as well. It adds to its firefighting preparation.

ETP:

It runs a 150-cubic-meter-an-hour capacity's effluent treatment plant of most contemporary technology. This ETP cleanses industrial effluents both chemically and biologically, and dehydrates sludge in the most environment friendly way.

Warehouse

Finished fabrics are stored conforming to the best protocols of contemporary industrial science.

Export

Maintaining a growth rate of over 15 percent, Unicom exported fabrics worth US\$ 21M in 2016, 24M in 2017 and 30M in 2018. By the end

of 2019, export is expected to reach the 40M mark. Growth has been projected to be continuing in the same fashion in years to come yet.

Products

Fabrics that Unicom produces include TC; CVC; Viscos; 100% Cotton, Solid, Print and Yarn Dyed fabrics.

Buyers

It manufactures and exports high-quality woven fabrics to the export-oriented garment factories – on demand. It is a licensee fabric manufacturer for the globally reputed buyers such as H&M, C&A, LPP, M&S, Perry Ellis and Celio.

David Howard, Prominent, Centerline and Aditya Birla import from Unicom.

Certificates & Awards

It can be mentioned that, Unicom is successfully certified and awarded with Oeko Tex, OCS, H&M (Gold) and C&A along with several other globally recognized quality, environment and management standards.

HR, Compliance

Nearly 1000 people are working here in most pleasant environment. As a world standard work place, Unicom is fully compliant abiding by the local and international conventions and provisions required and applauded.

Unicom Text

It provides personal health and hygiene measures, on time wages and other financial benefits, appropriate medical care, befitting maternity attention and benefits, safe and homely childcare services, and some other incentive, bonus, grants and recreational opportunities – many of which are not even mandatory in the given law of the country.

Firefighting preparation gets an extra emphasis here.

It exercises firefighting and evacuation drill on a regular schedule.
